

Firmware Upgrade Procedure

BLE Remote Controller ARC1000

version EN A1

Before doing firmware upgrade process, please follow below steps and unzip the firmware upgrade package.

Step 1 Ensure your Remote Controller is powered down. Then insert a microSD card* into your computer.

* Included in the BCC200 BLE package

Step 2 Copy and save the file **XS_ESP32.BIN** into the **ROOT** folder in the microSD card.

Step 3 Insert the microSD card into the Remote Controller.

Step 4 Power on the Remote Controller.

Step 5 After the upgrade tool has fully loaded, you will see an updating progress bar on LCD screen, it means that the Remote Controller is updating firmware and please **DO NOT** power off it when you see the warning!! Just wait until the upgrade procedure is completed!

Done Once completed the upgrade, verify your new version to make sure the upgrade was successfully completed.

Please do not TURN OFF power or REMOVE microSD card while the device is updating firmware as that will damage it!
